

ANMAR

Construction Africa (PTY) Ltd.

Safety, Health, Environment and Quality Policy

Anmar Construction Africa declares Zero Harm to our Employees, Co-Contractors and the various environments in which we operate. It is part of the company's fundamental value system that we apply strict Safety, Health, Environment and Quality standards in all our construction activities and services. We will make every effort to ensure that all projects are carried out in accordance with, or exceeding relevant legislation and site specific requirements.

Anmar Construction Africa is committed to:

- Meeting, and where applicable exceeding legal and other requirements to which we subscribe.
- Preventing and reducing all forms of pollution by using the best available technologies.
- Implementing effective waste management systems that focus on reduction, re-use and recycling of waste to minimize disposal.
- Maintaining transparent relationships with all stakeholders through effective communication.
- Meeting or exceeding customer requirements to ensure ongoing customer satisfaction.
- Providing adequate resources and financial provision to ensure effective Safety, Health, Environmental and Quality performance.
- The identification, assessment and management of risks to Employees and Co-contractors for the prevention of injury and ill health.
- Considering the clients needs and expectations regarding the quality of service and workmanship provided.
- Implementing, maintaining and reviewing an effective Safety, Health, Environmental and Quality Management System that drives continual improvement.
- Provide training and development that creates awareness and encourages active Employee participation in Safety, Health, Environmental and Quality programs, objectives and targets.
